INFANT AND TODDLER MENTAL HEALTH: MODELS OF CLINICAL INTERVENTION WITH INFANTS AND THEIR FAMILIES (PAPERBACK)

American Psychiatric Association Publishing, United States, 2002. Paperback. Condition: New. Language: English . Brand New Book. Countless studies have demonstrated the power of early intervention to permanently alter the course of a child s life. Yet -- heightened by the past decade s research breakthroughs in genetics -- the nature vs. nurture controversy rages on.This volume dispels some of the persistent myths surrounding this controversy. Unlike largely theoretical texts that describe infant behavioral and emotional difficulties and other psychosocial challenges affecting young children, this eminently practical guide illustrates what to do in numerous clinical situations with actual patients. Written by clinicians who work with infants and children and their families every day, this reality-based approach addresses the most common and important problems in infant psychopathology (e.g., trauma, sleep, feeding, excessive crying, attachment disruptions), covering models of intervention from pregnancy through infancy, attachment issues, and transgenerational themes. Here, you ll find topics rarely addressed elsewhere: Â The theoretical and clinical implications of trauma during early childhood and its effects on emotional regulation, cognition, and attachment, including potential disruptions of attachment -- a topic widely overlooked in the life of young children, perhaps because of the distress it produces in adults to think that infants can be subject to violence, witness major traumatic events, and experience consequences from such eventsÂ Techniques, such as multimodal parent-infant psychotherapy, for working effectively with families -- once considered unreachable -- who are under severe stress and have endured multiple disruptions, disappointments, and marginalizationÂ A timely discussion of a rarely addressed problem on the importance of early intervention and the effects of day care for infants, from the point of view of the infant exposed to multiple caretakers, addressing the very difficult questions of the effects on infants of changes in caretakersÂ How young children use their...
