Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

LID Publishing, United Kingdom, 2017. Hardback. Condition: New. Language: English . Brand New Book. Understanding the goals of the world of business and dealing with the development of new solutions calls for a basic ingredient: creativity. And yet, just being, or wanting to be creative is not enough - it is essential to train and develop this ability in order to achieve results. In other words, we need a guide to show us the way and provide us with the tools needed to progress. This book is an essential manual for Design Thinking which brings together all the tools you need to achieve innovation and entrepreneurship goals and organised around four basic processes: mapping, exploring, building and testing. It also reveals how, as long as you use the right tools, you can create original and effective solutions. Includes case studies to show how this is working for big companies (Orange or BBVA) as well as startups (Dovase or Bydsea).
