Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.SOME OF TODAY S MOST PROMISING CAREERS can be found in the pharmaceutical industry. Pharmaceutical researchers (also known as pharmaceutical scientists or pharmaceutical chemists) conduct research aimed at improving human health by developing new medications. They spend many hours in laboratories and with computers conducting experiments, analyzing the results, and preparing new drugs for manufacture. These professionals may find novel ways to extract substances from plants; synthesize new medications from chemicals; or design new therapies by combining existing medications in innovative ways. Most research positions are found at large pharmaceutical companies, biotechnology companies, and multinational chemical concerns that manufacture medicines. There are also opportunities to work with small private research labs, government regulators, nonprofit medical charities, and firms that conduct clinical trials. Some researchers teach at colleges and universities while pursuing their own projects. Some researchers specialize in the discovery of new medicines or on improving existing compounds. Scientists may also be engaged in testing new medications and gaining government approvals. Others oversee safety and logistical aspects for industrial-scale manufacturing of both prescription and over-the-counter drugs. The number of pharmaceutical research professionals is expected to grow in the coming decade. While competition is tough for the top jobs, salaries are high for these professionals. Government statistics show the average annual salary for medical scientists (a group that includes pharmaceutical researchers) is almost \$95,000. A survey by the American Association of Pharmaceutical Scientists (AAPS) found its members earn an average annual base salary of almost \$150,000. When bonuses and other supplemental income are added, the typical AAPS member makes more than \$180,000. Would a pharmaceutical career be right for you? Technical training is needed - even entry-level positions require a four-year...
