Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from *Marketing Activities: June 1953* In addition, oil content determinations can be made for flaxseed in quantity by two analysts at the rate of from 20 to 25 per hour with the new equipment. It costs about one-half the estimated cost of extraction equipment presently in use which will test about 36 samples daily. The new method is Simple enough that operators without technical training can, with brief instructions, perform the analyses with speed and accuracy. The rapid dielectric method for determining the oil content of soy beans was described in the July 1952 issue of *marketing activities*. In brief, it involves the use of a high-frequency oscillator for measuring the quantity of oil in a solvent-oil mixture. The samples are ground in a Special high-speed grinder - extractor tithe presence of an oil Solvent. The solvent-oil mixture is separated from.the ground material by filtra tion and is then placed in the cell of the electronic oscillator Unmeas ure its dielectric properties. The reading is converted to oil content by means of a conversion table. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
